PROFESSIONAL SUMMARY

Versatile Game Developer and Technical VFX Artist with a Bachelor's in Video Game Design & Development and over 4 years of hands-on experience in real-time visual effects, software quality assurance, and interactive mechanics prototyping. Proficient in Unity (C#, VFX Graph, Shader Graph), version control workflows, and runtime optimization, combined with a solid foundation in computer graphics, 3D math, and physics. Proven track record in remote, cross-functional production teams, bridging artistic vision with technical performance and stability under strict deadlines. Fluent in English and Spanish.

PROFESSIONAL EXPERIENCE & TECHNICAL PROJECTS

Visual Effects (VFX) Artist

01/2022 – Present

BackToBits · Part-time (Castellón, Spain)

- Design, author, and implement real-time visual effects and particle simulations tailored to gameplay feedback and aesthetic art direction.
- Develop customized shaders (Shader Graph, HLSL concepts) and texture sheets to deliver high-impact stylized effects.
- Profile and optimize particle budgets, draw calls, and overdraw to preserve target framerates across target hardware.
- Collaborate closely with designers and artists to establish cohesive visual language and gameplay clarity.

Software & Video Game QA Technician

07/2022 – Present

DAQA · Remote

- Perform comprehensive black-box, regression, and functional testing across live game builds and software releases.
- Investigate, isolate, and document technical bugs, system crashes, and reproduction steps with precise, actionable ticketing reports.
- Analyze technical edge cases, input latency, and build performance to uphold release stability and user satisfaction.

Software Developer & Emerging Technologies Researcher

10/2023 – 06/2026

Universitat Jaume I (Estudia i Investiga Program) & Instituto de Nuevas Tecnologías

- Engineered interactive augmented reality applications and mechanics in Unity (C#) using Niantic Lightship ARDK.
- Implemented responsive UI architectures, core gameplay interaction loops, and mobile runtime optimizations.
- Authored clear technical documentation, maintained Git repositories, and integrated AI-assisted prototyping workflows.

Technical Systems & Aerodynamics Contributor

10/2023 – 01/2026

UJI Motorsport - Formula Student Team

- Applied 3D surface modeling (SolidWorks) and fluid dynamics simulations (Star-CCM+ CFD) to optimize vehicle performance.
- Assisted in physical composite manufacturing (carbon fiber lamination) and real-time mechanical troubleshooting under competition pressure.
- Contributed to international podium achievements, including 1st Place Overall at Formula Student Portugal 2024.

TECHNICAL SKILLS

Real-Time VFX & 3D: Unity VFX Graph, Shader Graph, Niagara (Unreal), Blender, 3ds Max, SolidWorks.

Engines & Code: Unity (C#), Unreal Engine, Python, C++, Shader Logic / HLSL basics.

Tools & Systems: Git/GitHub, Visual Studio, Jira, Bug Tracking, Linux/Windows.

Methodologies: Real-time VFX Optimization, QA Testing, Systems Troubleshooting, Remote Agile.

Languages: English (C1 - Advanced), Spanish (Native), Catalan (C1).

EDUCATION & QUALIFICATIONS

Bachelor in Video Game Design & Development

Universitat Jaume I

2021 – 2026 (Expected Graduation: June)

Coursework in Computer Graphics, Shaders, 3D Mathematics, Physics Simulation, and Agile Project Management.

Auxiliary Operations in Electromechanics

Orbel Group Academy - Labora

04/2026 – 08/2026
